

Congress 2018

23-25 august - Amsterdam, the Netherlands

The Importance of Dental Ethics and Law

IDEALS was formed as a society in Amsterdam in 2001 during the fourth International Congress on Dental Law and Ethics. In the intervening years, the themes of the bi-annual Congress have included topics covering human rights, access and justice, information technology, insurance, autonomy and patient rights, responsibility and liability, and global oral health.

Now, 25 years after the first congress, it is timely to step back and take an overview of “The Importance of Dental Ethics and Law.” This will provide the opportunity to look at where we stand now, what has changed and what will be needed.
